New MG Trading store in Numurkah now open

Devondale Murray Goulburn is pleased to announce that its new Numurkah MG Trading store will commence trade today. The enhanced retail design will improve service, safety and access providing a more comfortable shopping environment for suppliers and customers in the area. It is more than three times the size of the original Melville St site and located at MG's existing prime location on the Goulburn Valley Highway. The local MG Trading team is looking forward to welcoming suppliers and customers into the new store to provide the exciting service and product developments enabled by the larger space and new location.

"With the long-term vision now brought to life, we are very proud of the new store and look forward to welcoming each and every customer to showcase the full range of products and services MG Trading has to offer", said Numurkah Store Manager, Liam Gledhill.

"Importantly, we would like to thank MG suppliers and customers for their support, especially whilst operating at the temporary site. Our team is really looking forward to providing the same personalised service our customers are used to in a brand new store. A celebration and official store opening is currently being planned and we will keep customers informed as these details are finalised."

MG director and regular MG Trading Numurkah customer, Natalie Akers commended the team, "Our local staff have done a fantastic job during the build of the new store, operating effectively from the temporary site and maintaining customer satisfaction. We are extremely pleased with the new Numurkah store and the support it will provide MG suppliers and customers in the region."

The build commenced in July 2015 and was completed on schedule. The new store offers a wide range of new services, the introduction and extension of many valued product lines and the return of some customer favourites. The additional services include a drive through fuel bowser offering ULP and diesel, and a dedicated high flow diesel for heavy rigid and commercial vehicles. The new store has plenty of parking facilities with ample bays for better access. There is also a drive through facility ideal for customers looking for undercover convenience when purchasing their farm and animal needs including produce and pet supplies.

The increased dimensions of the new MG Trading store will also provide access to a broader array of reputable brands and merchandise, including larger farm equipment, animal health products, dairy chemicals, agricultural chemicals, seed, fertiliser, irrigation equipment, stock feed, tools, hardware and more.

Customers are advised the contact details remain the same and are encouraged to call the store on (03) 5862-1166 or Liam directly on 0417 564 819. Alternatively you can visit the MG Trading website for the latest products, specials and advice at mgtrading.com.au.
