

Supplier Services

Helping new entrants, young farmers and farming families grow their business

In addition to the business support services offered by the Field Services team, Murray Goulburn also offers a range of initiatives to assist suppliers in meeting key business challenges and take advantage of opportunities.

Next Generation Dairy Rebate

MG's Next Generation Dairy Rebate offers financial support, in the form of an investment rebate, for young farmers, farming families and new entrants seeking to grow their business or enter the dairy industry.

Suppliers investing more than \$100,000 can apply for an investment rebate. The investment rebate availability depends on a number of factors, including the size of the investment and the expected additional milk production the investment will return.

Support is offered for up to three years for farmers who are in the process of:

- purchasing a dairy farm, dairy herd or irrigation water
- investing in farm infrastructure
- starting their own farming business
- expanding their current farming business
- entering into a farming partnership

MG Partnerships

MG Partnerships provides suppliers with an alternate pathway to farm expansion through the purchase of farmland which is made available to suppliers through leasing.

Under MG Partnerships, a combination of investor equity and leasing means a farmer's existing capital is available for other investments such as cows or new dairy infrastructure.

MG currently have farms under lease arrangement in North, West and East Victoria.

MG Milkroom

MG Milkroom has replaced MGFarm, providing suppliers with instant access to the critical information and tools required to support the productivity and profitability of farm businesses. With simple navigation and the ability to view on mobile devices, you can easily locate real-time information, when you need it.
